FISH (Ichthyology)

Sea-horses and Sea-dragons are among the more bizarre sea creatures.

The Swedish booklet shown above illustrates a number of aspects of commercial fishing – another good subject for a collection.

ENTOMOLOGY

Entomology is the study of insects. There are more than 10,000 stamps and because of this, people select one area, with butterflies and moths common.

A selection of butterflies is shown above.

Many moths are dull but there are plenty of colourful species.

ENTOMOLOGY

One can also collect one of the following groups.

Disease-carrying insects.

Tse-Tse Fly

Mosquito

Bee-Keeping

Bee

Honey Bees

Crop Pests

Potato Beetle

Locust

Armyworm

Corn Earworm

Beetles

Alpine Longhorn

7-spotted ladybug

Jewel Beetle

CONTACTS

WEBSITE - www.biophilately.org

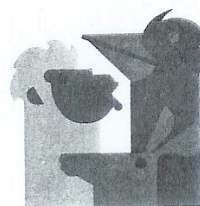

PRESIDENT - Fran Hammond
1511 E. Coronado Avenue, Cortez, CO 81321

MEMBERSHIP SECRETARY - Chris Dahle
1401 Linmar Drive, Cedar Rapids, IA 52402

Dues are \$20 one full year. Overseas airmail add \$10
Airmail to Canada or US First Class add \$5

EDITOR - Alan J. Hanks
34 Seaton Drive, Aurora, Ontario L4G 2K1, Canada

Many thanks to Wallace Ashby, Chris Dahle, Paul Mistretta, Michael Prince, Chuck Braun, Kris Lindstrom & Donald Wright Jr. for loaning exhibit material.
